Numerical values of surface and line tensions from the three sets of independent simulations

December 16, 2022

Table 1: Numerical values of surface and line tensions from the three sets of independent simulations; lipid numbers N_{ol} and N_{il} in the outer and inner leaflets; interfacial tension Σ of liquid-liquid interface between α droplet and aqueous bulk phase β; membrane segment tensions Σ and Σ of the two membrane segments and ; as well as contact line tension λ. The three surface tensions are given in units of k_BT/d^2, the line tension in units of k_BT/d.
